

LNG FACTS

PIPELINE

AES Sparrows Point LNG proposes to bring 4 million man-hours in construction jobs, \$13 + million per year in taxes, and \$40 + million per year in spin-off business to your area, while lowering your energy costs, and cleaning the environment. Here's a related **LNG PIPELINE FACT**:

LNG MEANS COST SAVINGS FOR MARYLANDERS

- The natural gas arrives in liquid form; before sending it out to pipelines, it will be converted back to the same natural gas we use to heat, cook, and run our businesses and power plants.
- Maryland has no natural gas reserves; we get all gas from the interstate pipeline system; AES's natural gas will be piped to the regional system that supplies Maryland.
- More natural gas means lower gas & electricity prices for your homes and local businesses due to supply/demand principles.
- When more natural gas comes into your system, regardless of where it enters, you will get the benefits. It's that simple.
